Bengaluru, India

Vidhuram N

Portfolio

Professional Summary

Senior Unity XR developer with 5+ years in software development, including 3.5+ years building AR, VR, MR and WebXR applications and real-time 3D simulations for healthcare, industrial, and hospitality clients. Skilled in Unity3D, C#, OpenXR, Oculus SDK, and SteamVR, with strengths in physics-based interactions, performance optimization, Photon multiplayer networking, and cross-platform deployment. Built reusable VR and 360° frameworks adopted across multiple client projects, and published 10+ XR applications to the Meta Horizon Store, WebGL, App Store, and Play Store. Experienced in owning the full delivery cycle from requirement gathering to release, leading client demos, and mentoring developers.

Education

B.Tech, Computer Science & Engineering
Government Engineering College, Wayanad
2016 – 2020

Higher Secondary Certificate
Bhavan's Vidya Mandir
2016

Experience

Unity Developer
InfiVR
06/2024 – 06/2026 | Bengaluru

- Built and maintained interactive AR/VR and WebXR training apps in Unity3D/C# for healthcare and industrial clients — Basic Life Support, Infection Control, Load Slinging, and Lockout-Tagout.
- Architected a reusable 360° web experience framework, sharply improving deployment efficiency and scalability across projects.
- Migrated 3+ VR training modules to WebXR, greatly expanding browser accessibility.
- Designed a reusable VR framework architecture adopted across multiple training apps, improving maintainability and cutting development effort.
- Optimized performance with Unity Profiler, URP rendering techniques, and disciplined asset management.
- Published and maintained applications on the Meta Horizon Store — handling submission, review, and updates.
- Integrated REST APIs via Postman for seamless data flow and third-party connectivity; contributed to multiplayer VR simulations with real-time synchronization.
- Mentored 4+ new developers, reducing onboarding time and improving development consistency.
- Led client interactions — requirement gathering, demos, and technical issue resolution.

Lead Unity Developer
LifeVR
09/2023 – 05/2024 | Bengaluru

- Led end-to-end Unity3D development as sole Unity Developer, delivering AR/VR applications for high-profile industrial and hospitality clients.
- Built VR apps for browsing and exploring 360° life-event videos with immersive UI workflows.
- Created immersive VR walkthroughs showcasing luxury hotels and industrial facilities.
- Spearheaded VR collaboration projects, enabling team-based immersive experiences with multiplayer features.
- Reduced app load times by 20% through performance profiling, mobile optimization, and rendering improvements.
- Owned the full lifecycle from asset implementation through app-store publishing, exceeding client expectations on tight deadlines.

Associate Software Engineer, QA
Ernst & Young (EY) — GDS
02/2022 – 09/2023 | Trivandrum

- Ran comprehensive functional and report testing for a Tax Form Validator and PowerBI dashboards.
- Automated test suites with Selenium-Java, improving testing efficiency, coverage, and system reliability.
- Supported Azure cloud-based QA projects using the Pester testing framework; trained in AWS and cloud service testing.

Software Developer
ManasVR Labs
03/2021 – 02/2022 | Thrissur

- Built engaging VR/AR applications and interactive games in Unity3D with intuitive UI/UX workflows.
- Handled backend development — integrating cloud services, authentication systems, and databases.
- Integrated AR/VR features and improved application stability through systematic debugging and optimization.

Core Skills

- **Unity & C#** — Unity3D, C#, Unity 6, URP | Unity Profiler, Visual Scripting
- **AR / VR Development** — Oculus SDK, OpenXR, SteamVR | WebXR, Meta Quest
- **Multiplayer / Networking** — Photon, Real-time Sync, Multiplayer VR
- **Web Technologies** — WebXR, 360° Frameworks, API Integration | Hosting & Deploy
- **3D & UI** — 3D Asset Integration, Animations | UI Systems, Physics Interactions
- **Performance Optimization** — Profiling, Rendering Opt., Memory Mgmt | Mobile Opt.
- **Platforms** — Meta Horizon Store, Android VR, WebGL | Multi-platform VR
- **Cloud & Backend** — Azure, AWS, GCP, Databases | Auth Systems
- **QA / Testing & Tools** — Selenium-Java, Automation, Postman | Git, Visual Studio

Key Projects

Healthcare & Industrial VR Training
Simulations for healthcare protocols (BLS, Infection Control) and industrial safety (Load Slinging, LOTO) with physics-based interactions and real-world data.

360° Experience Framework
Reusable, scalable system for interactive web-based and WebXR training, enabling an efficient deployment pipeline across client projects.

Multiplayer VR Collaboration
Team-based real-time VR simulations with synchronization and networking via Photon for seamless collaborative immersion.

Interactive AR Equipment Visualizer
AR experience showcasing a physical device and its components with intuitive real-time 3D interaction and spatial understanding.

VR Walkthroughs
Immersive exploration apps with optimized 3D assets, UI navigation, and animations for hospitality venues and industrial facilities.

Certifications

- AZ-900: Azure Fundamentals
- Udemy: Unity Game Engine & C#
- EY Innovation Bronze: Agile Methodology
- GCP: Architecting with Google Compute Engine

Key Achievements

- Developed 10+ XR applications for healthcare, industrial, and hospitality clients.
- Built a reusable 360° framework adopted across multiple customer deployments.
- Published applications to the Meta Horizon Store, WebGL, App Store, and Play Store.
- Led client demos, technical discussions, and requirement gathering; contributed to multiplayer VR architecture using Photon.

Soft Skills

- Client interaction
- Cross-functional collaboration
- Technical documentation
- Mentoring
- Agile methodology
